

If you were to ask anyone about Harry, they would say how sweet and kind he is. He has the biggest heart. He always wants to help and do things for others. He is only 10, but as others would say...he's an old soul. We live on a 130 acre farm. He is always helping his grandpa with him in the summer by driving the John Deere tractor. He has been obsessed with John Deere since he was a baby the only other thing that he loves possibly more is his puppy Waylon. Santa brought Waylon to Harry for Christmas last year. Little did we know about a month later he was going to be his emotional support dog that calms him on days he gets chemo.

Harry was diagnosed January 26 of 2022 with B cell acute lymphoblastic leukemia. Since then, our lives have changed a lot. Harry is a fighter we have an amazing team that helps us. We have also met so many amazing people and kids during this journey. I'm sure we will continue to meet amazing people in the future. I hope Harry touches you all the way he touches those around him who meet him.
