

# Hunter's Story

On March 2, 2009, at the age of 5, Hunter was diagnosed with stage two kidney cancer. He had a Wilm's Tumor which is the most common childhood cancer. He has had three major surgeries, the loss of the left kidney and adrenal gland and six long months of tough chemo treatments, still with some lasting effects. But today, he is in remission, and happy, fun 10 year old silly boy! .
