

Her mom shared below about Iryl:

"We knew Iryl had a heart defect in utero, but once she was born we found out there was much more. She was born at 34 1/2 weeks, with heterotaxy- missing, misplaced and mishapen organs, sacral agenesis- her spine ends early and she has no sacrum. She had 1 surgery to repair duodenal atresia and malrotation of the intestines at 4 days old and has had 4 open heart surgeries."

Iryl has one brother, Sebastian who is 12 and one sister, Lucy who is 20.

Iryl loves Pandas, so therefore her favorite colors are black and white. She really loves all animals, art, games, and video games.
